

## VEMO – electronic parts by VIEROL

The quality brand VEMO has strongly developed into one of the fastest growing specialists in the international independent aftermarket for electronic vehicle parts.

Started in 1998 as a joint project with leading OEMs like AEG Motorenwerke and Robert BOSCH AG, we have kept up with customer needs, and provide the widest range of fan and small engines for German vehicles. Since its beginnings VEMO – Vierol Elektro Motoren Oldenburg – has developed into a brand name known worldwide, with customers and distribution partners in more than 125 countries.

In over 100 product groups we offer you more than 15,000 electrical parts and components for fuel supply and for exhaust gas recirculation from European vehicle manufacturers. Many of our products bear the Q+ quality seal. It identifies vehicle parts produced in first class original quality.

We are flexible, dynamic and foresighted. As your trusted partner we develop repair solutions for the independent aftermarket, and analyse repair requirements for registered vehicles via country-specific databases. We continually invest in improving our logistics processes, and guarantee access to technical information as well as availability of our VEMO quality products via [www.autoteile.de](http://www.autoteile.de) - around the clock. High resolution, detailed product images in 360 degree perspective also allow accurate identification of product characteristics. With VEMO we combine technical expertise and individual customer requirements to ensure the highest quality and service. Trust in us and give us a try!

### **Our top 3 core product groups**

#### **Sensors & Switches**

Over 3,700 items in stock, including more than 800 different references in Q+ OEM quality

- More than 1,500 sensors & switches packaged in iSP foil for protection against electrostatic discharge
- Chips from manufacturers such as HP and Infineon
- Vehicle-specific coded connectors guarantee maximum installation safety

#### **Exhaust gas recirculation**

More than 600 items in stock, including more than 440 items in Q+ OEM quality

- Service-oriented delivery, including gaskets
- debitable, high-density, and visually appealing welds through a special laser welding process
- Styrofoam inlays provide ideal protection during transport and storage

#### **Small engines**

Over 1,000 items in stock, including 400 products in Q+ OEM quality

- DC engines with and without transmission
- Reversible engines are lighter, smaller and provide multiple functions
- Reliable, quiet operation mode
