

ACKOJAP – asian parts by VIEROL

ACKOJAP is the quality brand for Korean and Japanese automotive parts, available in MADE IN KOREA OEM quality. The ACKOJAP range includes tailor-made and high-quality repair solutions for the latest, and common, Asian vehicle applications.

The core product groups of ACKOJAP include all types of filters, components for engine drive and cooling as well as wiper systems. Clutch kits and key components for the engine such as high pressure pumps, injectors, throttle valves, EGR valves and more complete the ACKOJAP range.

Core product groups

Air, fuel and oil filters

- multi-layer non-woven material ensures optimum filtration in accordance with OEM requirements
- impregnated activated carbon layer has an antibacterial effect
- high-quality OEM cellulose fibres ensure pressure resistance

Engine drive & Cooling

- water pumps made from corrosion-resistant aluminium die-casting with OEM sealing
- OEM ball bearings and increased lubricating grease parts guarantee a long lifetime of the tension and guide rollers
- weight-optimised guide rollers with plastic or steel rails reduce noise and vibration

Wiper Systems

- OEM quality guarantees a long lifetime
- high-quality OEM worm gear units ensure that the wiper motors operate with low noise emission
