

ENGINE OIL

OILS & CHEMICALS | 29002

Purpose

The main purpose of engine oil is to lubricate the mechanical components in the engine. Its function is to reduce the friction of the moving parts and the wear resulting from this. But the engine oil in modern engines must also fulfil other, much more complicated tasks.

Tasks

- Lubrication of the components
- Wear protection
- Fuel economy
- Cleaning
- Cooling
- Protection against corrosion

SYMPTOMS

- Oil light is on
- Irregular engine function
- Clogged motor
- Unclean combustion
- Increased oil consumption

CONSEQUENTIAL DAMAGES

- Defective lubrication due to insufficient oil supply
- Foaming of the oil
- Decreased lubrication effect from breakage of the oil film
- Greater wear of the components
- Dirty oil channels
- Serious mechanical damage
- Engine damage

RECOMMENDED BY THE EXPERTS

- Have the oil level regularly checked
- Observe the stipulated change interval
- Use oil specification stipulated by the manufacturer
- Promptly execute change intervals, particularly for older vehicles
- Renew the oil, the hydraulic filter and the seal rings, including the oil drain plug, every oil change

REASONS FOR FAILURE

- Too much/too little oil
- Wrong oil
- Change interval has been exceeded

ENGINE OILS FROM VAICO

You can find more information at www.autoteile.de

- **Increased lubrication reliability:** targeted additive, optimal lubrication
- **Quality:** the VAICO quality brand offers products according to the original approvals
- **Transport safe:** 1 and 5 litre canisters with leak-proof induction

ENGINE OIL
