

INTAKE MANIFOLD MODULES

AIR CONTROL SYSTEMS | 13205

The intake manifold module mixes the recirculated exhaust gases with cooled air and distribute them back to the individual cylinders. That air flow is regulated through swirl flaps. Over time, they get dirty with soot, which prevents them from closing completely or restricts their movement. Consequences: Error messages in the vehicle and a reduced engine performance.

VAICO offers high-quality intake manifold modules for the most common applications. Our VAICO products are made of high quality PA6GF30 material which ensures excellent wear performance and high resistance to heat.

Complete quality check during the production and custom welding processes ensure faultless and durable products.

All VAICO intake modules are supplied with gaskets and other necessary components. For instance, the VAICO intake module for Audi-VW 2.0 TFSI engines (V10-3954) includes not only the seals, but also the matching rotation sensor.

List of parts

| | | |
|----|------------------------|----------------|
| 1x | Intake Manifold Module | 06J 133 201 BH |
| 1x | Seal | 06F 129 717 D |
| 1x | Seal | 06F 133 073 D |
| 1x | Rotation Sensor | 07L 907 386 |

SYMPTOM

- Error message in the vehicle

REASONS FOR FAILURE

- Flaps are soiled by soot
- Flaps do not close properly anymore

CONSEQUENTIAL DAMAGES

- Reduction of engine performance

INTAKE MANIFOLD MODULES BY VAICO

This and other articles from the Intake Manifold range can be found on www.autoteile.de

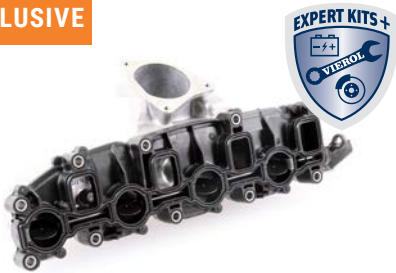

- **PA6FG30 Material:** high resilience, excellent resistance to wear
- **Seals included:** workshop-oriented repair kits, known as Expert Kits +
- **Comprehensive quality test** on-site: resistance to heat, pressure test
