

# NEUTRAL SAFETY MULTIFUNCTION SWITCHES, AUTOMATIC TRANSMISSION

23201

## Functions

- Transmission of the gear selector lever to the transmission control unit
- Supply of a control signal for turning the cruise control on and off
- Switching the reverse light on and off
- Blocking the starter motor when a gear is selected

**AUDI A4, A6, VW PASSAT**

X-Ref: 01V 919 821 D  
01L 919 821 A  
01L 919 821 C  
01V 919 821 C  
01V 919 821  
01L 919 821 B

**V10-73-0021**

**AUDI A4, A6, A8, VW PASSAT**

X-Ref: 01V 919 821 B | **V10-73-0435**

## Fault Codes

VAG	Faulty part or subsystem	Possible cause(s)
00293	Gear selector lever	Harness, bad bonding, gear selector lever
00789	Reverse gear switch	Harness, reverse gear switch, gear selector lever
17090	Gear selector lever - Area error / Function error	Harness, gear selector sensor
17100	Gearbox input shaft speed sensor / Turbine shaft speed sensor - Area error / Function error	Harness, harness shield, input shaft sensor, engine speed signal, gear selector lever, transmission oil level, torque converter, clutch/ brake slip, jammed magnet valve
17101	Gearbox input shaft speed sensor / Turbine shaft speed sensor - no signal	Harness, harness shield, input shaft sensor, engine speed signal, gear selector lever, transmission oil level, transmission speed sensor, torque converter, clutch/ brake slip, jammed magnet valve
